Note: Rankings include all 217 World Bank Atlas economies, but only those with confirmed Atlas GNI estimates are shown in rank order. Figures in italics are for 2017 or 2016. From this update we are discontinuing ranking countries without at least a data point from last three years.

a. Based on data from official statistics of Ukraine and Russian Federation; by relying on these data, the World Bank does not intend to make any judgment on the legal or other status of the territories concerned or to prejudice the final determination of the parties' claims. b. Based on data officially reported by the National Statistics and Censuses Institute of Argentina. The International Monetary Fund (IMF) has called on Argentina to adopt measures to address the quality of official GDP and consumer price index data, and issued an updated statement on Argentina's progress on August 31, 2016:

<http://www.imf.org/en/News/Articles/2016/08/31/PR16389-Statement-by-the-IMF-Executive-Board-on-Argentina>. The World Bank systematically assesses the appropriateness of official exchange rates as conversion factors. For Argentina, an alternative conversion factor has been calculated using a weighted average method for the period from 2012 to 2015. c. Includes Former Spanish Sahara. d. Covers mainland Tanzania only. e. Data are for the area controlled by the government of Cyprus. f. Excludes Abkhazia and South Ossetia. g. Excludes Transnistria.
